

## **Bajaj Finserv Direct Limited**

### **Job Description**

**Role- Associate Engineer, Tech-Delivery  
(React Native Developer)- GB02**

**Location – Pune**

## About Bajaj Markets:

Bajaj Markets, a subsidiary of Bajaj Finserv and one of the fastest growing fintech in India, is a one-stop digital marketplace that offers multiple financial products across all categories - Loans, Cards, Insurance, Investments and Payments. Bajaj Markets has partnered with some of the most trusted names to offer choice to its customers and help them achieve their financial life goals.

Having started its journey as a fintech, Bajaj Markets has since then, built a very strong business as a techfin. Its Technology services businesses are built on its core capabilities in consumer insights, technology and data analytics. Its first B2B SBU, Skaleup, has been created to become the leading digital technology services provider in India through deep domain expertise and execution capabilities.

Besides this, Bajaj Markets has built a new business unit to become the preferred partner for digital technology initiatives across all group companies of Bajaj Finserv. Herein, the strategy is to align with digital technology roadmap objectives of all the group companies of Bajaj Finserv and offer digital technology services and platforms at market competitive rates.

As the tagline goes, with Bajaj Markets, “Ab Choices Hue Aasaan”

With a strong foundation already established, you have an opportunity to be part of a distinct consumer technology company.

**Bajaj Markets** (Description of the Business Unit- BFSI/B2B Captive/B2B Non Captive)

## Primary Role

- Using the React ecosystem, design and create user interface components for JavaScript-based online and mobile apps
- For tight interfaces with both platforms – Android and iOS – use Native APIs
- Create automated tests to check that your code is error-free and that it performs well
- Enhance front-end performance by removing performance bottlenecks

## Responsibilities & KPIs

- Develop front-end modules with the highest level of code reusability and efficiency
- Use smooth animations to create a fantastic user interface
- Use third-party dependencies and APIs
- Work with Redux architecture to increase website/mobile app speed
- Collaborate with cross-functional teams to build apps within the time/budget constraints
- Reach out to the open source community to encourage and help implement mission-critical software fixes—React Native moves fast and often breaks things.
- Maintain code and write automated tests to ensure the product is of the highest quality.
- Transition existing React web apps to React Native.
- Should have exposure working on SCRUM – Agile methodology
- Excellent problem solving and decision-making skills
- Ability to handle a high volume of work with deadlines to meet

## Desired Skills

- Understanding of Software Development Life Cycle (SDLC)
- Minimum 1-3 years of experience in React Native developer interested in building performant mobile apps on both the iOS and Android platforms. processes, practices, and deliverables
- Should know Custom Development using APIs (Plugins, Services, Events, Migration, etc.)
- Ability to work effectively with little or no supervision and minimal direction
- A thorough grasp of the whole mobile app development process, beginning with the prototype

- Understanding of type checking, unit testing, typescript, prop types, and code debugging is required
- Worked with REST APIs, document request models, offline storage, and third-party libraries in the past
- Understanding of user interface and responsive design
- In-depth understanding of software development methodologies, concepts, and processes
- Previous experience developing big, complicated web and mobile apps
- The ability to build and manage a flawless continuous integration and delivery pipeline for React Native apps
- Knowledge of React Native's best practices and design aesthetics
- A positive attitude and a desire to learn constantly
- Stay up to speed on the latest React Native developments, technologies, and news
- The ability to develop clean, well-documented code that adheres to the acceptable coding principle
- B.E/B.Tech degree in computer science, information science or related field from a leading institute.
